BOARD OF PODIATRIC MEDICINE
DEPARTMENT OF CONSUMER AFFAIRS
STATE OF CALIFORNIA

In the Matter of the Accusation
Against:

James C. Van Wagenen, D.P.M.
License # E-1203

No. D-3744

Respondent.

DECISION

The attached Stipulation of the Board
of Podiatric Medicine is hereby adopted by the Department of
Consumer Affairs, State of California, as it's Decision in the
above-entitled matter.

This Decision shall become effective on December 8, 1988.

IT IS SO ORDERED December 8, 1988.

BOARD OF PODIATRIC MEDICINE
Department of Consumer Affairs
State of California
William Landry, D.P.M., Chairman

DIVISION OF MEDICAL QUALITY
9 BOARD OF PODIATRIC MEDICINE
DEPARTMENT OF CONSUMER AFFAIRS
10 STATE OF CALIFORNIA

11 In the Matter of the Accusation) No. D-3744
12 Against:)
13 JAMES C. VAN WAGENEN, D.P.M.) STIPULATION, DECISION
3381 North Bond Avenue) AND ORDER
14 Fresno, CA 93726)
15 License No. E-1203)
16 Respondent.)
17

18 The Board of Podiatric Medicine, through its legal
19 counsel John K. Van de Kamp, Attorney General, by and through
20 Deputy Attorney General Joel S. Primes, and James C. Van Wagenen,
21 D.P.M., by and through his legal counsels, Theodora Poloynis-
22 Engen and Steven A. Brown.

23 1. On or about August 25, 1965, respondent James C.
24 Van Wagenen, D.P.M. (hereinafter "respondent") was issued license
25 No. E-1203 by the Board of Podiatric Medicine (hereinafter
26 "Board"). Respondent has engaged in the practice of podiatric
27 medicine in the State of California pursuant to the certificate

1 which remains in good standing.

2 2. On or about September 6, 1988, the Board filed a
3 First Amended Accusation No. D-3744 against respondent. Said
4 accusation was filed by Carol Sigmann, Executive Officer for the
5 Board, acting in her official capacity.

6 3. Said accusation, ~~statement to respondent~~, copies of
7 Government Code sections 11507.5, 11507.6, and 11507.7 and notice
8 of defense were duly served upon respondent. Respondent filed a
9 timely notice of defense.

10 4. Respondent has retained legal counsel to advise him
11 as to the allegations made in the accusation and in executing
12 the stipulation. Respondent is represented by Theodora Poloynis-
13 Engen and Stevan A. Brown.

14 5. Respondent desires to avoid the expense and
15 emotional distress attendant to a full evidentiary hearing and
16 therefore enters into this agreement.

17 6. For the purposes of this proceeding and any
18 subsequent proceeding between the parties, respondent admits the
19 allegations listed in the First Amended Accusation. (Attached
20 and incorporated herein as Exhibit A.) Respondent admits that
21 the following allegations constitute repeated negligent acts:

22 Patient Julia B.

23 Page 3, paragraph 2;

24 Page 4, paragraph 3; and

25 Page 4, "Post-operation management."

26 ///

27 ///

1 Patient Margaret M.

2 Page 7, paragraphs 1, 2, 3, 4, 5, 6, and 7.

3 Patient Annette J.

4 Page 10, paragraphs 2, 3, and 4.

5 Patient Wanda K.

6 Page 12, paragraphs 2, 3, 4, and 5.

7 Respondent asserts he had a good faith belief that his actions
8 were warranted given the symptoms presented. In the interest of
9 fairness, the following allegations are dismissed:

10 Patient Julia B.

11 Page 3, paragraph 1.

12 Patient Margaret M.

13 Page 8, paragraph 6.

14 Patient Annette J.

15 Page 10, paragraph 1.

16 Patient Wanda K.

17 Page 12, paragraph 1.

18 7. Respondent has discussed the charges and
19 allegations of the violations alleged in accusation No. D-3744
20 with his legal counsel and is aware of his rights under the
21 Administrative Procedure Act of the State of California,
22 including his right to a formal hearing and opportunity to defend
23 against the charges, the right to reconsideration and the right
24 to appeal any adverse decision that might be rendered following
25 the hearing.

26 8. Respondent waives the right to a hearing, the right
27 to cross-examine witnesses, the right to present evidence in his

1 defense, the right to introduce evidence in mitigation, the right
2 to reconsideration, and the right to appeal any adverse decision
3 which the Board might render following an administrative hearing
4 held pursuant to the provisions of the Administrative Procedure
5 Act of the State of California.

6 9. Respondent has been informed by his legal counsel
7 that as a direct consequence of waiving the aforementioned rights
8 and making the aforementioned admissions and stipulations, the
9 Board may issue an order and decision disciplining his license,
10 No. E-1203.

11 10. Based on the admissions and waivers set forth in
12 this stipulation, respondent agrees that the Board may issue the
13 following order:

14 ORDER

15 Certificate No. E-1203 heretofore issued to respondent
16 is hereby revoked. However, the revocation is stayed and
17 respondent is placed on probation for five years upon the
18 following terms and conditions:

19 A. Board Fine

20 1. Respondent shall pay to the Board as a fine
21 \$15,421.74 and said amount is due in full within four and one-
22 half years following the effective date of this stipulation.
23 Respondent may make quarterly payments to the Board over a four
24 and one-half year period with the first installment due 120 days
25 following the effective date of this stipulation. Subsequent
26 installments shall be due every 90 days from the date of the
27 first installment. Said payments shall be sent directly to the

1 Board or its designee.

2 2. Failure to pay the \$15,421.74 fine in regular
3 installments, with no less than one-third having been paid at the
4 end of 18 months of probation following the effective date of the
5 decision; and subsequent thirds at the end of each of the
6 following 12 months and 24 months, will result in revocation of
7 the license without any further hearing until such arrearage has
8 been paid.

9 3. Failure to pay the total amount of \$15,421.74 by the
10 end of five years following the effective date of the decision
11 will result in revocation of license No. E-1203 without further
12 hearing. This fine shall not be discharged in bankruptcy.

13 B. Education Courses

14 Within 90 days after the effective date of this
15 decision, respondent shall submit to the Board, or its designee,
16 for approval an educational program of pharmacology, surgical
17 principles, infectious disease and perioperative evaluation.
18 The educational program shall consist of not less than 40 hours
19 per year for the first two years of probation, and 25 hours per
20 year for each subsequent year of probation. The educational
21 program shall be in addition to the Continuing Medical Education
22 (hereinafter "CME") requirements for relicensure. Upon the
23 completion of each course, the Board, or its designee, may
24 administer an examination to test respondent's knowledge of the
25 course. Respondent shall provide proof of attendance at the CME
26 courses required by this educational courses requirement to the
27 Board on an annual basis. Respondent shall also provide proof of

1 attendance at the CME courses required for relicensure at license
2 renewal periods occurring during the probationary period.

3 C. Compliance with Required Continuing
4 Medical Education

5 Respondent shall annually submit satisfactory proof to
6 the Board of compliance with the requirement to complete 50 hours
7 of approved continuing medical education for relicensure during
8 each two-year renewal period.

9 D. Oral Clinical Examination (OCE)

10 Respondent shall take and pass an oral clinical
11 examination to be administered by the Board, or its designee;
12 subject to the following conditions:

13 1. The examination shall consist of no more than five
14 questions of a practical, clinical nature. The purposes of this
15 examination, which shall be communicated to the examiners in
16 advance of the examination, are to identify areas of practice
17 needing remediation, if any, and to ascertain whether respondent
18 is able to practice podiatric medicine with reasonable skill and
19 safety to patients. The examination shall not include questions
20 regarding the treatment of ankles.

21 2. Respondent shall take an OCE within 90 days of the
22 effective date of this decision. If respondent fails the
23 examination, or refuses to take the examination, he shall,
24 without further hearing, cease to perform all podiatric medical
25 and surgical care except for the routine trimming of corns,
26 callouses and toenails and the treatment of superficial skin
27 conditions, physical therapy and whirlpool.

1 3. The OCE shall be administered in accordance with
2 the "Oral Examination Instructions for Licensure Candidates,"
3 ~~except that respondent will not be examined on the ankle. The~~
4 final ruling on whether respondent passed or failed the OCE shall
5 be subject to the Board's initial split panel review procedure
6 and post examination appeal procedure contained in 16 California
7 Code of Regulations section 1399.661.

8 4. Respondent shall take a second OCE within 90 days
9 after receiving written notification that he has failed, or
10 ~~refused to take, the first OCE.~~ Upon failure of, or refusal to
11 take, this OCE, a notice shall be issued from the Board ordering
12 respondent to cease the practice of podiatric medicine, and
13 license certificate No. E-1201 is revoked without further hearing
14 until he takes and passes said OCE.

15 5. Respondent shall pay the costs of each OCE.

16 ~~6. If respondent demonstrates any areas of~~
17 deficiencies in the clinical practice of podiatric medicine
18 during the OCE, the areas of deficiencies shall be included in
19 the CME requirement and added to "Educational Courses" set forth
20 in this stipulation.

21 7. All examinations shall be administered by two
22 ~~examiners selected from a list of 15 names that shall first be~~
23 submitted to respondent who shall have the right to disqualify up
24 ~~to 8 names therefrom. The Board shall provide to respondent the~~
25 curriculum vitae for each nominee. This information will
26 accompany the list.

27 ///

1 8. Commencing with the effective date of the Board
2 ~~decision and until respondent passes the OCE respondent shall~~
3 perform no first and fifth metatarsal osteotomies. All other
4 surgeries require prior approval from his monitor.

5 E. Monitor

6 Respondent must have the aspects of his practice
7 involving all podiatric medical and surgical care (except the
8 ~~routine trimming of corns, callouses and toenails and treatment~~
9 of superficial skin conditions, physical therapy and whirlpool)
10 subject to the review and supervision of another doctor of
11 podiatric medicine who shall act as a monitor on behalf of the
12 Board. Within 30 days from the effective date of the decision,
13 respondent shall nominate at least three doctors of podiatric
14 medicine to serve in the capacity of monitor and shall submit the
15 names of the three nominees to the Board, or its designee, for
16 approval. If the Board rejects all the names submitted,
17 respondent shall have fourteen (14) days from receipt of notice
18 thereof in which to submit another list of at least five names.
19 If the nominees are again rejected the Board or its designee
20 ~~shall allow respondent to nominate 10 more licensees. The~~
21 selection of a monitor shall be accomplished within 4 months of
22 the Board decision. The parties shall each exercise due
23 diligence and good faith in the selection of a monitor.

24 1. Respondent shall pay the costs of establishing and
25 maintaining the monitor. The financial relationship between
26 respondent and the monitor shall be recorded in a written
27 contract, attached hereto as attachment B, to be used by

1 respondent and his monitor. The cost of the monitor shall not
2 cause or involve additional charges to patients.

3 2. The monitor shall visit the respondent twice a
4 month for the first three months of probation and once a month
5 for the duration of the probationary period.

6 3. The Board shall have the right to terminate the
7 monitor, if it determines that the monitor has failed to execute
8 the duties, responsibilities and powers vested in him or her by
9 the terms of the stipulation in a professional manner.
10 Respondent shall accept the decision of the Board to discharge
11 the monitor.

12 4. If the monitor becomes unable to serve for the
13 duration of the probationary period, he or she shall provide a
14 written resignation to the Board, or its designee, within 10 days
15 prior to the date on which he or she ceases to serve as monitor.

16 5. If the monitor resigns, respondent shall nominate at
17 least three doctors of podiatric medicine to serve in the
18 capacity of monitor and shall submit the names of the three
19 nominees to the Board or its designee for approval within 30 days
20 of the effective date of the resignation of the prior monitor.
21 If the Board rejects all the names submitted, respondent shall
22 have fourteen (14) days from receipt of notice thereof in which
23 to submit another list of at least five names. If the nominees
24 are rejected, the Board, or its designee, shall appoint a monitor
25 within 45 days of the resignation of the prior monitor.
26 Respondent shall accept the selection of the monitor. The
27 parties shall each exercise due diligence and good faith in the

1 selection of a monitor.

2 6. If the Board, or its designee, determines that the
3 resignation of the monitor is caused by the failure of respondent
4 to fulfill the terms of the contract with the monitor, or is
5 caused by the interference of respondent with the duties of the
6 monitor, respondent shall be deemed to be in violation of
7 probation and upon written notification by the Board, or its
8 designee, and following said hearing the Board may issue an order
9 to respondent to cease to practice podiatric medicine until the
10 Board, or its designee, appoints a new monitor. Respondent shall
11 accept the selection of the monitor.

12 7. Respondent shall complete a minimum of 2 years
13 under the review and supervision of the monitor, subject to the
14 terms provided in the stipulation and contract. At the
15 conclusion of the 2-year period, the monitor shall submit to the
16 Board, or its designee, a written recommendation concerning the
17 need for continuing the monitorship. While on probation upon the
18 recommendation of the monitor, the Board may continue to require
19 the monitor, reduce the duties of the monitor, or eliminate the
20 requirement of the monitor.

21 F. Prior Approval for Podiatric Surgery

22 While on probation, respondent shall obtain the prior
23 approval of the monitor prior to performing any podiatric
24 surgery. Exception: The routine trimming of corns, callouses
25 and toenails and treatment of superficial skin conditions,
26 physical therapy and whirlpool.

27 1. When seeking prior approval, respondent shall use

1 the written forms provided by the Board. (See attachment C.)
2 Respondent shall include on the forms an assessment as to the
3 appropriateness of, and indication for, the procedures to be
4 used, including the review of all preoperative records and
5 laboratory evaluations, a delineation of the contraindications
6 for the procedure, and approval for the surgery.

7 2. All authorizations shall be signed and dated by the
8 monitor and respondent. All patient care approval forms
9 submitted to the monitor shall be forwarded to the Board, or its
10 designee, by certified mail on a monthly basis by the respondent.
11 Respondent shall maintain evidence of surgery authorizations for
12 each patient. However, such authorizations shall not become a
13 part of the permanent medical records of the patient.

14 3. Respondent is authorized, if necessary, to mail all
15 patient records to the monitor to obtain approval. For purposes
16 of this stipulation, patient records are all data obtained and
17 utilized by respondent in evaluating and treating surgical
18 patients.

19 4. The monitor may authorize treatment by telephone
20 after a review of all patient records. The patient records shall
21 be subject to inspection by the Board, or its designee, upon
22 reasonable notice by the Board, or its designee.

23 5. Respondent shall keep a log of all podiatric and
24 medical surgical procedures performed (except for the routine
25 treatment of corns, callouses and toenails and superficial skin
26 conditions). The treatment log shall include entries for (a) the
27 date of the initial visit, (b) date of informed consent, (c) the

1 date the treatment/surgery was performed, and (d) the type of
2 treatment/surgery performed.

3 During the visits of the monitor, the monitor shall
4 randomly select and review the postoperative and other medical
5 treatment records of at least ten percent of the total patient
6 care cases recorded in the logs. The monitor shall evaluate the
7 appropriateness of care and shall provide a monthly written
8 summary of findings to the respondent and to the Board, or its
9 designee. ~~The patient care logs shall be subject to inspection~~
10 upon reasonable notice by the Board, or its designee.

11 6. Respondent is prohibited from performing any
12 surgery on the first visit of a patient unless the surgery is
13 required by a medical emergency. Respondent shall keep a written
14 record of all surgeries required by medical emergencies in a
15 separate log book and this log book shall contain the information
16 required of all other surgeries.

17 G. Patient Charts

18 Each patient chart shall contain a record of the chief
19 complaint of the patient in the handwriting of the patient or
20 signed by the patient. Each patient chart shall contain a record
21 of all diagnostic tests performed, pertinent information
22 involving conservative therapy decisions, and documentation that
23 respondent has noted the results and the justification for action
24 taken or not taken. Respondent's treatment decision shall be
25 outlined with reference to diagnostic tests.

26 H. Cessation of Practice Procedure

27 Respondent shall comply fully with the protocol

1 established by the Board for suspending, or concluding, the
2 podiatrist-patient relationship if respondent is required,
3 pursuant to the terms and conditions of the stipulation, to cease
4 the practice of podiatric medicine entirely, or to cease
5 performing the surgical procedures requiring the prior approval
6 of the monitor. The protocol shall include, but is not limited
7 to, the time and manner of suspending or concluding the
8 podiatrist-patient relationship, referral of patients to other
9 physicians or podiatrists and continued medical treatment of
10 patients. The Board shall provide the written protocol for
11 suspending or concluding the podiatrist-patient relationship
12 concurrently with its notification requiring respondent to limit
13 or cease his practice of podiatric medicine as required by this
14 stipulation. Respondent shall have 45 days from Board
15 notification to comply with this procedure. The Board shall
16 continue the procedure upon a showing of reasonable cause.

17 I. Tolling for Cessation of Practice

18 In the event respondent fails to satisfactorily complete
19 any provision of the order of probation, which results in the
20 cessation of practice, all other provisions of probation other
21 than the submission of quarterly reports shall be held in
22 abeyance until respondent is permitted to resume the practice of
23 podiatry. All provisions of probation shall recommence on the
24 effective date of resumption of practice. Periods of cessation
25 of practice will not apply to the reduction of the probationary
26 period.

27 ///

1 J. Obey All Laws

2 Respondent shall obey all federal, state and local
3 laws, and all rules governing the practice of podiatric medicine
4 in California.

5 K. Quarterly Reports

6 Respondent shall submit quarterly declarations, under
7 penalty of perjury, on forms provided by the Board stating
8 whether there has been compliance with all the conditions of
9 probation.

10 L. Surveillance Program

11 Respondent shall comply with the Board's probation
12 surveillance program.

13 M. Interview with Podiatric Medical Consultant

14 Respondent shall appear in person for interviews with
15 the Board's medical consultant, upon request, at various
16 intervals, and with reasonable notice.

17 N. Tolling for Out-of-State Practice or Residence

18 In the event respondent should leave California to
19 reside or to practice outside the state, respondent must notify
20 the Board in writing of the dates of departure and return.
21 Periods of residency or practice outside California will not
22 apply to the reduction of this probationary period.

23 O. Completion of Probation

24 Upon successful completion of probation, respondent's
25 certificate will be fully restored.

26 P. Violation of Probation

27 If respondent violates any of the terms and conditions

1 of probation in any respect, the Board, after giving respondent
2 notice and an opportunity to be heard, may revoke probation and
3 carry out the disciplinary order that was stayed.

4 If an accusation or petition to revoke probation is
5 filed against respondent during probation, the Board shall have
6 continuing jurisdiction until the matter is final and the period
7 of probation shall be extended until the matter is final. There
8 are no other investigations pending against respondent at this
9 time.

10 Q. This stipulation is unique to this case. It is
11 not a precedent and should not be considered as an example of a
12 model stipulation.

15 Fresno, CA 93726)
16 License No. E-1203)
Respondent.)

No. D-3744

FIRST AMENDED ACCUSATION

17 Complainant Carol Sigmann, for a first amended
18 accusation, alleges:

19 1. Complainant is the Executive Officer of the Board
20 of Podiatric Medicine, Board of Medical Quality Assurance and
21 makes and files this first amended accusation in such official
22 capacity. This First Amended Accusation supersedes and replaces
23 nunc pro tunc the accusation heretofore filed.

24 2. On August 25, 1965, respondent was issued California
25 podiatrist license number E-1203. Respondent's license is
26 current with an expiration date of March 31, 1988.

27 ///

1 3. The Board of Podiatric Medicine has jurisdiction
2 over this matter pursuant to Business and Professions Code
3 section 2497.^{1/}

4 4. Respondent is subject to disciplinary action
5 pursuant to Business and Professions Code section 2234(b)^{2/} in
6 that respondent is guilty of gross negligence as is more
7 specifically set forth herein.

8 5. Respondent is subject to disciplinary action
9 pursuant to Business and Professions Code section 2234(d)^{3/} in
10 that respondent is guilty of incompetence as is more
11 specifically set forth herein.

12 A. Patient: Julia B., Age: 50

13 The patient first presented on August 13, 1984 with
14 complaint of pain in both bunion joints, the right more than the
15 left. Respondent notes "no pain on palpation of the right." On
16 October 16, 1984 respondent performed metatarsal osteotomies in
17 the middle to distal one-third of the shafts of the first and
18 fifth metatarsal of both feet. Respondent did not use any form

19
20 1. Business and Professions Code section 2497 provides:
21 "The board may order the denial of an application for, or the
22 suspension of, or the revocation of, or the imposition of
23 probationary conditions upon, a certificate to practice
24 podiatric medicine for any of the causes set forth in Article 12
25 (commencing with section 2220) in accordance with section 2222."

26 2. Business and Professions Code section 2234(b) provides
27 that "In addition to other provisions of this article,
unprofessional conduct includes, but is not limited to . . .
(b) Gross Negligence".

28 3. Business and Professions Code section 2234(d) provides
29 that: "In addition to other provisions of this article,
unprofessional conduct includes, but is not limited to . . .
(d) Incompetence."

1 of internal fixation, but gave the patient an unna boot and
2 utilized tape.

3 The post-operation X-rays of October 16, 1984
4 demonstrate that the osteotomy sites failed to show good
5 apposition. The left first metatarsal is markedly displaced
6 plantarly, approximately 30 degrees. The right first metatarsal
7 is slightly more displaced. Gaping is visualized dorsally. The
8 right hallux is in extreme varus position. A lateral view of
9 the right foot reveals an extreme plantarflexion deformity of
10 the first metatarsal segment with very little bony apposition
11 present. The October 22, 1984 X-rays reveal continual
12 malposition, with significant shortening of first and fifth rays.
13 The osteotomies both subluxed post-operatively and respondent
14 obtained a second opinion which recommended internal fixation of
15 both of the osteotomies.

16 Respondent was grossly negligent and incompetent in the
17 performance of the osteotomy surgery and in the post-operative
18 management of this patient as is more specifically set forth
19 below:

20 SURGERY

21 1. Respondent was grossly negligent by failing to
22 perform a complete initial podiatric physical and vascular
23 examination prior to surgery. Respondent did not document a
24 review of the dorsalis pedis nor posterior tibial pulses.

25 2. Respondent was grossly negligent in the selection
26 of the diaphyseal location of the osteotomy site for both the
27 first and fifth metatarsals. This location is improper due to

1 the greater incidence of nonunion. If performed in this region
2 internal fixation should have been used. A bone plate or
3 crossed pin should have been used in the shaft. Respondent was
4 grossly negligent and incompetent in not recognizing the initial
5 malposition and potential for nonunion.

6 3. Respondent was grossly negligent and incompetent in
7 failing to recognize the malalignment of the osteotomy sites as
8 revealed on the October 1984 X-rays. Respondent should have
9 recognized the malalignment and rectified it early to effect
10 prompt healing.

11 POST-OPERATION MANAGEMENT

12 Following surgery patient Julia B. experienced a
13 shortening, delayed healing and malunion of the bones involved.
14 The left foot was reoperated on with pins and wires placed in
15 the affected bones.

16 Respondent was grossly negligent and incompetent in the
17 post-operative management of patient Julia B. Respondent failed
18 to recognized the mal-position and subsequent nonunion. The
19 right fifth metatarsal was not properly fixated. A monofilament
20 wire was used. Either a bone plate or crossed pins should have
21 been used. Respondent failed to recognize malalignment of the
22 osteotomy sites as revealed in the X-rays. Respondent should
23 have recognized this and taken steps to effect prompt healing.
24 Respondent subjected this patient to a second surgery for
25 unrecognized malunion and failed to recognize a second
26 malposition of bone after this surgery. This subjected the

27 ///

1 patient to a non-healing osteotomy for which further tertiary
2 surgery was necessary.

3 B. Patient: Margaret M., Age: 75

4 This patient presented on June 3, 1985 with a complaint
5 of "bunion and hammertoe each foot". On June 13, 1985
6 respondent performed a modified Lapidus bunionectomy bilateral
7 and Akin osteotomy of the proximal phalanx of the hallux
8 bilateral with lateral capsulotomy of the first metatarsal
9 phalangeal joint, hammertoe correction by arthroplasty of the
10 second digits bilateral and left fifth digit. No manner of
11 fixation was used. Postoperative X-rays of that day show hallux
12 varus, an improper post operative alignment. Post-operative
13 shoes only were dispensed.

14 On June 15, 1985 follow-up visit, redressing with unna
15 boot applied to both feet.

16 On June 18, 1985 soft dressing applied.

17 On June 21, 1985 another redressing.

18 On June 26, 1985 patient went without shoes for two
19 days. Dorsal displacement of the first metatarsal on both feet
20 is noticed.

21 On July 1, 1985 physical therapy and re-taping.

22 On July 8, 1985 physical therapy and re-bandaging.

23 On July 17, 1985 "left fifth digit was hit and swelled".

24 On July 22, 1985 X-rays show pronounced dorsiflexion
25 deformity of the distal aspect of the first metatarsal.

26 On July 24, 1985 X-rays taken which showed metatarsal
27 head "dropped down quite a bit, but in the process it has

1 dropped down quite a bit more". The July 24, 1985 pre-op
2 diagnosis is "Non-union fracture at the base of the right first
3 metatarsal, limitation of motion of the first
4 metatarsophalangeal joint, right foot and flail left fifth
5 digit".

6. On July 24, 1985 the following surgery was performed:
7 "Repair of 'non-union' fracture, right first metatarsal at the
8 base and a modified Keller bunionectomy of the right first
9 metatarsophalangeal joint, syndactyly of the fourth and fifth
10 digits of the left foot". Fixation effected with a stainless
11 steel suture. Patient was fitted with non-weight bearing
12 fiberglass cast.

13 On September 18, 1985 X-rays were taken of both feet. A
14 lateral view of the right foot indicates a dorsiflexion
15 deformity of the distal aspect of the first metatarsal and an
16 oblique view reveals there is poor apposition of the
17 osteotomized fragments with a gaping area centrally.

18 On September 24, 1985 surgery performed by Richard
19 Ehlert, D.P.M. as follows: "Transverse dorsal capsulotomies of
20 the 2nd and 3rd metatarsophalangeal joints with tenotomies of
21 the extensor digitorum longus and extensor digitorum brevis of
22 the 2nd and 3rd digits of the right foot as well as transverse
23 osteotomies of the fifth metatarsal proximal to the surgical neck
24 of the fifth metatarsal, bilateral". Follow-up visits in
25 September of 1985 reveal the patient had increasing pain
26 symptoms and difficulty getting to respondent's office. Patient
27 is subsequently referred to Dr. Bell in Walnut Creek.

1 Respondent has engaged in unprofessional conduct in the
2 care for this patient as follows:

3 1. Respondent was grossly negligent to perform an
4 osteotomy of the first metatarsal on both feet with osteotomy of
5 the hallux and bunionectomy as well as hammertoe procedures
6 while providing the patient with only soft taped dressing and
7 post operative shoes. No internal fixation was used. When the
8 closing wedge osteotomies are performed in the proximal
9 diaphyseal region of the first metatarsal some form of fixation
10 or casting is required.

11 2. Respondent failed to recognize an immediate
12 subluxation post-operatively of the osteotomy, specifically at
13 the base of the first metatarsal. Incompetence is demonstrated
14 when 6 weeks following the initial surgery, a diagnosis of
15 nonunion is made of the right first metatarsal and staples were
16 used. This is inappropriate for a displaced, through and
17 through bone cut. This allows continued displacement and
18 movement of the bone contributing to nonunion.

19 3. Respondent was incompetent for not providing
20 immobilization.

21 4. Respondent's failure to recognize and treat a
22 dislocation of an osteotomy immediately post-surgery evidences
23 gross negligence. The osteotomy was not closed by the time of
24 the second surgery on July 24, 1985. Respondent's failure to
25 close the osteotomy with fixation constitutes gross negligence.

26 5. Respondents failure to diagnose the nonunion of the
27 first metatarsal on the right foot constitutes gross negligence.

1 This nonunion continued to displace and the movement of the bone
2 contributed to the nonunion.

3 6. Because of improper immobilization this patient
4 suffered an additional mal-position and ultimate mal-union of
5 the fifth metatarsal osteotomies. Post-operative X-rays of
6 February 23, 1985 reveal a complete failure to reposition the
7 fifth metatarsal osteotomy site. There is almost no bony
8 apposition between the fragments and a useless metallic fixation
9 device is observed in the operative site. There was no
10 reduction of the marked displacement prior to the fixation.
11 This constitutes gross negligence and incompetence.

12 7. In his treatment of this patient respondent has
13 repeatedly failed to recognize significant post-surgical
14 complications. Respondent has failed to effectively correct
15 post surgical complications, encouraged and allowed a colleague
16 to perform additional unwarranted and unwise surgery not related
17 to the ongoing problem on this patient in spite of the ongoing
18 complications from the initial surgery. Respondent's failure in
19 the first immobilization of the first metatarsal osteotomy was
20 followed by his second failure to improperly immobilize the mal-
21 union of the fifth metatarsal osteotomy. This conduct
22 constitutes gross negligence and incompetence in the care of this
23 patient.

24 8. On June 13, 1985 respondent used 20cc of marcaine
25 1/2% with epinephrine as a total ankle block. Respondent
26 utilized epinephrine with the local anesthetics for digital
27 blocks. This is contraindicated in the digits due to potential

1 circulatory embarrassment in this 75 year old patient who had a
2 history of hypertension. This constitutes gross negligence.

3 C. Patient: Annette J., Age: 26

4 This patient presented on April 20, 1983 with a chief
5 complaint of painful bunions bilaterally and fifth metatarsal
6 heads laterally.

7 On April 22, 1983 the following procedures were performed
8 on the patient's left foot: "Displacement osteotomy left first
9 metatarsal at surgical one-third distal metatarsal. Silver
10 bunionectomy left foot. Osteotomy left fifth metatarsal bone."

11 On April 29, 1983 the identical procedures were performed
12 on the right foot.

13 On May 9, 1983 a second metatarsal osteotomies were
14 performed using minimal incision techniques. The postoperative X-
15 rays demonstrate the 2nd osteotomies to be in the diaphysis,
16 approximately in the junction of the distal and middle one-third
17 of the bone.

18 On June 26, 1984, the patient is seen by Dr. Kruger. The
19 majority of the patient's complaints relate to the third and
20 fourth metatarsal heads. The patient is referred to the
21 California College of Podiatric Medicine. The patient has
22 excessive elevation at the previously performed osteotomy sites.
23 The patient will develop hallux limitus. An osteotomy of the
24 third and fourth metatarsals is recommended. This is eventually
25 performed by Dr. Kruger on October 14, 1984.

26 ///

27 ///

1 Respondent was grossly negligent and incompetent in the
2 performance of the osteotomy surgeries and in the post-operative
3 management of this patient as is more specifically set forth
4 below:

5 SURGERY

6 1. Respondent was incompetent by failing to perform a
7 complete initial podiatric physical and neurological evaluation.
8 Respondent only notes that Babinski reflexes are absent.

9 2. Respondent was incompetent in performing extensive
10 bone surgery two days following the patient's initial
11 presentation. No alternative treatments are tried or explained.
12 The patient was not given an ample amount of time to consider
13 other treatment options. Respondent failed to pursue
14 conservative therapy which he attempted on the first visit and
15 orthotic treatment which he instituted preoperatively. The
16 continuance of conservative care may have alleviated the
17 necessity for subsequent surgery.

18 3. Respondent was grossly negligent and incompetent in
19 the selection of the diaphyseal location of the osteotomy site
20 for both the first and fifth metatarsal surgeries. Respondent
21 cut through the bone at the distal-most aspect of the metatarsal
22 in the region of the neck. This location is improper due to the
23 greater incidence of nonunion. If performed in this region
24 internal fixation should be used. Diaphyseal osteotomies have a
25 tendency to shorten due to more bone resorption at the osteotomy
26 site unless extensive fixation is utilized. The X-rays
27 substantiate the elevation of the capital fragment and

1 significant shortening of the first metatarsal. This causes
2 excessive compensatory stress to the lateral segments of the
3 foot.

4 4. Respondent was incompetent on May 9, 1983 by
5 performing osteotomies of the second metatarsals ten days
6 following osteotomy of the first and fifth metatarsal (April 22,
7 1983). The other osteotomy sites are not particularly stable at
8 this point in time.

9 D. Patient: Wanda K.

10 This patient presented on August 22, 1984 with a
11 complaint of a painful ingrown right hallux nail that had been
12 symptomatic for a few months.

13 On May 30, 1985 a "modified lapidus bunionectomy and Akin
14 osteotomy at the proximal phalanx is performed bilaterally. A
15 base wedge osteotomy of both first metatarsals was performed, the
16 right foot osteotomy in the diaphyseal portion of the bone, the
17 left osteotomy being a through and through cut. Akin type
18 osteotomies were also performed bilaterally. The left close to
19 the joint line and the right at the junction of the metaphysis
20 and diaphysis. No form of fixation is demonstrated.
21 Postoperative medications includes Naprosyn and Augmentin.

22 On June 3, 1985 a culture is taken because of "seepage
23 from the wound." A June 6, 1985 culture revealed a heavy growth
24 of gram positive rods. On June 7, 1985 Augmentin is again
25 prescribed.

26 ///

27 ///

On June 10, 1985 bilateral second metatarsal osteotomies were performed. On June 12, 1985 Augmentin is discontinued and Bactrim is prescribed.

On June 26, 1985 the patient discontinued Naprosyn upon orders from her family doctor due to possible allergic reaction.

On September 3, 1985 surgery is performed as follows: Osteotomy third metatarsals, exostectomy of fourth toes, soft tissue release for recurrent hallux valgus left, and ingrown surgery left hallux. Naprosyn was again prescribed postoperatively.

Respondent was grossly negligent and incompetent in the performance of the osteotomy surgeries and in the postoperative management of this patient as is more specifically set forth below:

SURGERY

1. Respondent was incompetent on June 10, 1985 where he performed a second metatarsal osteotomies bilaterally eleven days following the bunion surgery of May 30, 1985. There is no acceptable medical necessity for this procedure at that time.

2. Respondent was grossly negligent when on May 30, 1985 he performed a right first metatarsal osteotomy in the diaphyseal location. Respondent did not utilize some form of rigid bone fixation such as a pin, wire, screw, or bone plate.

The left foot osteotomy site of the first metatarsal was not stabilized by a rigid form of fixation. No portion of cortex of bone is intact.

///

1 3. Respondent was incompetent when six days following
2 surgery he prescribed Augmentin. A culture was taken on June 3,
3 1985 because of wound drainage. On June 7, 1985 Augmentin was
4 again prescribed. The antibiotic sensitivity patterns do not
5 support this prescription.

6 4. Respondent was grossly negligent when he performed
7 bilateral osteotomies of the second metatarsals three days after
8 antibiotics were prescribed for a suspected infection at the
9 initial operative sites. Respondent should have reassessed the
10 infection and eradicated the suspected infection and recultured
11 prior to an additional surgery. It was inappropriate to perform
12 this elective procedure while there were lab indications of
13 infection.

14 5. Respondent was incompetent when Naprosyn was
15 prescribed post-surgery on September 3, 1985. The patient was
16 potentially allergic to this medication (June 26, 1985 note).
